ORMAF is an innovative web-based software which is specifically designed to facilitate managers not only in the development of performance measurement strategies but also in implementing these measurement and monitoring policies within their daily management routines

ORMAF is designed to provide reports for managers at all levels of the department.

Strategic, Operational & Project

Three tier functionality, dashboards and reports provided by ORMAF are very effective in providing senior management with a departmental oversight of performance measurement activities as well as updated strategic information on the monitoring plans, activities, updates and status.

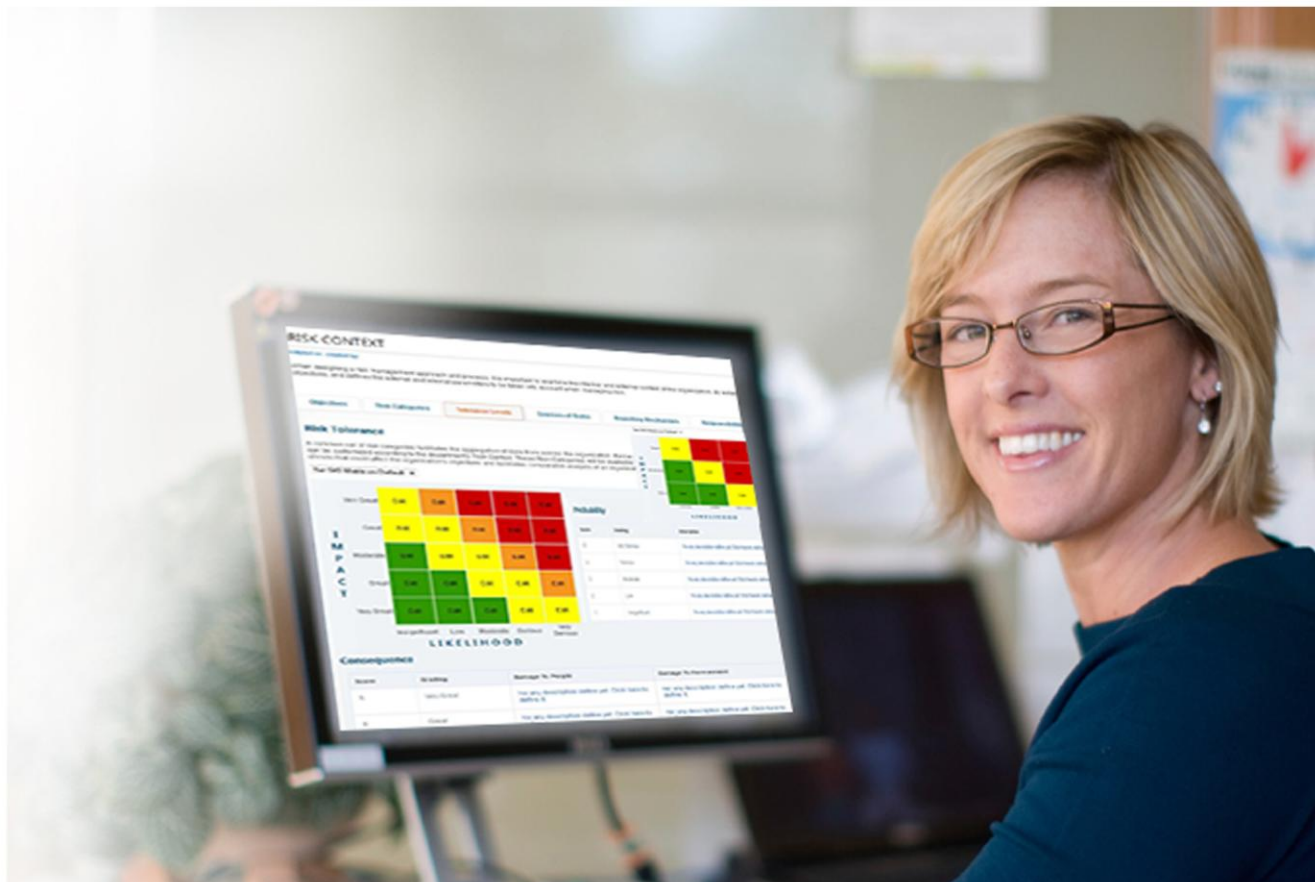

The modern days' online collaboration and communication features provide all the tools managers require to regularly communicate with responsible parties and stakeholders and effectively report on performance and results. It is an effective tool to ensure that up-to-date performance information is readily available for decision-making and reporting (DPR, RPP and other).
